# **Homestuck Symbols: U+F1A00 - U+F1A3F**

Proposal:

## **Homestuck Symbols**

This proposes to encode symbols from Andrew Hussie's webcomic *Homestuck* into the Unicode Conscript Registry. This specifically excludes the Alternian alphabet, which is simply the Daedric alphabet, or sometimes a version flipped 180 degrees. Those alphabets will be encoded in another proposal.

## **Structure**

This block is subdivided into the following ranges.

The remaining symbols on the Homestuck proposal are a large number of ZWJ sequences. While a full specification is available <a href="https://example.com/here">here</a>, a summary is provided below.

The first group of ZWJ sequences provide the Extended Zodiac, a set of signs specified <a href="here">here</a>. Zodiac signs are specified by a blood sign, a moon, and an aspect, in that order.

-----

The second group of sequences are the hybrid troll romance symbols. These are specified by two of the troll romance quadrants, and a control character either broken or joined. Broken should render the symbol as broken (like U+1F494). Joined, the symbols should render as one unbroken symbol.

\_\_\_\_\_

the final ZWJ sequences are two, for the flags of Derse and Prospit.

## EXAMPLES

These multi-character sequences are specified to provide support for extended troll romance symbols and the extended zodiac.

Please note that, because of the fixed length of the extended zodiac signs and the use of break/join modifiers to end troll romance sequences, only one joiner is actually required, to signal that the previous glyph ispart of a sequence. Once complete, the intended multi-character sequence is unambiguous, even without additional joiners.
